

Communication Committee Year Summary August 2007 to July 2008

Although the Communication Committee is small in number, their dedication to working together to help improved Locust Lake Village is their common purpose.

The members of the committee are Rose Conley, Ken DeVito, Howard Powell and Sue Ross.

- The minutes published by all the Committees has improved. This improvement helps all Village members read about and feel a part of the committee meetings.
- The Office Staff has taken on more responsibility in their support of the LLV Web site. Thanks to Sue Ross, her training and technical support has been invaluable to the office.
- The office begun the use of group mail. This has been well received by all members and will continue going forward.
- The logo of the home page was changed to reflect the beginning of the Village in 1970. The Village has a 40th anniversary coming up in less than two years.
- The information on the web calendar was expanded and the committee worked with Pat Kahn for the posting of recreation activities on the web site.
- The committee facilitated the installation of wireless internet connection in the Chalet. This is a nice amenity for the members of the Village.
- We purchased a web cam for the Chalet. The installation has been delayed because of the construction work but we expect to have it up and operational by the end of July. The design and installation of the web cam could not have proceeded without the technical knowledge and support of Howard Powell.

Going forward through 2008 and into 2009 the Committee should continue to reinforce the importance of committee minutes from all committee chairs and work with the office to include the address of our web page on all communication and stationary. We also like to invited new members to join us.

Rose Conley
Communication Committee Chair
